Gustavo Barbosa Portela

Full Stack Developer // web systems and APIs

Portfolio | GitHub | LinkedIn

Passo Fundo, RS, Brazil | (54) 99369-8492 | gubportela@gmail.com

ABOUT ME

Full Stack Developer with hands-on experience building web applications, REST APIs, and corporate systems. I work with React, Next.js, TypeScript, JavaScript, Node.js, Python, and FastAPI, as well as PostgreSQL, Supabase, Docker, and Git. Experience across the full software development lifecycle, including architecture, implementation, integration, deployment, and application maintenance. I aim to contribute robust, scalable, and results-oriented solutions while continuously growing in software engineering.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Saicon / SGPSAIcon — Apr 2026 — Present

Passo Fundo, RS, Brazil · sgpsaicon.com.br

Full Stack development of web applications, working on Frontend, Backend, REST API integration and consumption, databases, and third-party services. Worked with different stacks and technologies according to project requirements, taking part in architecture, infrastructure, implementation, deployment, and application maintenance.

IT Infrastructure / Support Intern — Passo Fundo City Hall — Feb 2026 — Apr 2026

Worked in IT support and infrastructure, including hardware diagnosis and maintenance, operating system cloning and deployment, computer and peripheral configuration, end-user support, and network and infrastructure equipment maintenance and setup.

PROJECTS

SN250 — Animal Nutrition and Farm Management Platform — sgpsaicon.com.br

Full Stack development of a web platform for managing scales, pens, lots, animals, diets, and premixes, using React, TypeScript, Material UI, Tailwind CSS, FastAPI, Python, PostgreSQL, Redis, Meilisearch, and Docker. Worked on Frontend, Backend, REST APIs, JWT authentication, databases, and infrastructure.

SN800 — Forest Weighing and Operations Management Platform — sn800.com.br

Full Stack platform for forest weighing and operations management, with load control, productivity tracking, and operational indicators, built with Next.js, React, TypeScript, Tailwind CSS, Supabase/PostgreSQL, and REST APIs.

Bugiganga — Mobile E-commerce — GitHub

Frontend development of a mobile e-commerce application with React Native, integrating REST APIs and a Java/Spring Boot and PostgreSQL backend. Responsible for interfaces, reusable components, navigation, and integration across application layers.

SKILLS

frontend

React | Next.js | TypeScript | JavaScript | React Native | Material UI | Tailwind CSS

backend

Node.js | Python | FastAPI | NestJS | Rust | REST APIs | JWT | WebSocket

data / infra

PostgreSQL | Supabase | Redis | Docker | Git | GitHub | AWS | Azure

engineering

SOLID | Design Patterns | Clean Code | OOP | Software Testing | Data Modeling | Git / Git Flow | CI/CD

languages

Portuguese native | English intermediate | Spanish intermediate

EDUCATION

Bachelor of Computer Science — Atitus — 2025–2028

4th semester · expected graduation 2028
